

- Exercise evaluation at 16:00 (A) and 18:00 (B) in EI 2 Pichelmayer HS
- **Compulsory attendance** (Attendance Sheet and in first two sessions exercise checklists used) in exercises, one excused miss okay.
- Presentation of exercise results (with notebook/beamer) will be done at the next session on 11<sup>th</sup> of January 2013; selected solutions will be presented by one (or more) of you.
- For the presentation it is highly recommended that one member of your group presents with his/her notebook.
- The group itself can choose how to share this exercise sheet (and the previous ones) and decide how closely to interact with each other. Please let us know as soon as possible if members of your group are no longer active.
- Please send your files with your solutions by Thursday January 10, 23:59h to [wdei@dbai.tuwien.ac.at](mailto:wdei@dbai.tuwien.ac.at).
- For the submission attachment please use the syntax „[group]\_X.[suffix]“ where [group] is your group number and [X] is the exercise sheet number; suffix depending on file type (zip, rar, tar.gz containing all files of your application). In case you send an update please add a “U” at the end.

### Exercise Sheet 6: Mind Map of Group Project

Discuss within your group how you are going to handle the selected project topic. Prepare a short presentation (e.g. in PPT, OpenOffice and convert it to PDF) with about 2-5 slides that contains

- your first thoughts about the topic and how you will plan the group project, brainstorming notes
- positioning of the topic, relations to other topics, differentiation from similar topics
- a mind map of notions you want to clarify and further research (you can also use a mind mapping tool for this purpose)
- which web sites, papers and/or books you plan to have a closer look at, tools you will evaluate, or aspects of a chosen tool that you evaluate
- what will go into the paper only and what will go into the presentation
- which examples you intend to use
- how you share tasks within the group
- and what else comes to your mind

Keep the presentation and mind map concise, do not give a detailed introduction to the topic in this presentation or unfold too many details (reduce to what is needed for understanding the mind map).

*In case your group is smaller than five participants, you can pick some sub aspects of a chosen topic to focus on (depending on the actual number of active group members)*

The distribution of topics is published on the last slide of the lecture of 14<sup>th</sup> of December.
